## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claim 2, 5, 8, 9, and 12-16 have been considered but are moot in view of the following restriction requirement.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 2, 5, 8, 9, and 12, drawn to a spread spectrum transmitter, classified in class 375, subclass 146.
  - II. Claims 13, 14, 15, and 16, drawn to a transmitter, classified in class 375, subclass 295.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
